SAMPLE MEDICAL REPORT

DEMO DOCUMENT — NOT FOR CLINICAL USE

Patient Information

Patient ID	P001
Patient Name	Aakash
Age	58 years
Gender	Male
Report Date	11 September 2026

Clinical Summary

This sample report is created for demonstration of an Electronic Health Record (EHR) application. The patient record indicates a history of coronary artery disease (heart disease). The information below is fictional and is intended only for software testing and presentation.

Diagnosis

Coronary Artery Disease (CAD)

Treatment / Management Plan

Continue prescribed cardiac medications as directed by the treating physician. Maintain a heart-healthy diet, engage in appropriate physical activity as medically advised, monitor blood pressure and cholesterol, and attend regular cardiology follow-ups.

Clinical Notes

Patient requires ongoing cardiovascular monitoring. Review symptoms, medication adherence, blood pressure, lipid profile, and other relevant investigations during follow-up visits. Any new or worsening symptoms should be evaluated by a qualified healthcare professional.

Sample Investigation Summary

Investigation	Sample Result	Reference / Note
Blood Pressure	132/82 mmHg	Monitor regularly
Total Cholesterol	190 mg/dL	Review with physician
LDL Cholesterol	112 mg/dL	Individual target varies
Heart Rate	76 bpm	Resting measurement

Blockchain/EHR Demo Note: This document can be uploaded to the application as a sample medical report. The application may calculate a cryptographic hash and associate the document with an IPFS CID and blockchain transaction.

This is fictional sample data. It must not be used to make medical decisions.
