SAMPLE MEDICAL REPORT

DEMO DOCUMENT — NOT FOR CLINICAL USE

Patient Information

Patient ID	P001
Patient Name	Aakash
Age	58 years
Gender	Male
Report Date	11 September 2026

Clinical Summary

This sample report is created for demonstration of an Electronic Health Record (EHR) application. The patient record indicates a fictional case of COVID-19 (coronavirus infection). The information below is fictional and intended only for software testing and presentation.

Diagnosis

COVID-19 (Coronavirus Disease)

Treatment / Management Plan

Follow the treatment plan prescribed by the treating physician. Maintain adequate hydration, rest as advised, monitor symptoms, and follow applicable infection-control guidance. Seek medical evaluation if symptoms become severe or worsen.

Clinical Notes

Patient requires appropriate monitoring of respiratory symptoms and general condition. Review temperature, oxygen saturation, respiratory status, medication adherence, and other relevant investigations during follow-up. Any new or worsening symptoms should be evaluated by a qualified healthcare professional.

Sample Investigation Summary

Investigation	Sample Result	Reference / Note
COVID-19 Test	Positive	Fictional sample result
Temperature	100.2 °F	Monitor regularly
SpO■	96%	Resting measurement
Respiratory Rate	18 /min	Sample observation

Blockchain/EHR Demo Note: This document can be uploaded to the application as a sample medical report. The application may calculate a cryptographic hash and associate the document with an IPFS CID and blockchain transaction.

This is fictional sample data. It must not be used to make medical decisions.
